The Planetary Health Pledge is the most influential community of leading philanthropists committed to sustainable development and environmental protection issues.

The Pledge members are gathered together on the occasion of two annual high-level and confidential meetings, which are held in exceptional locations in Monaco or abroad.

The programme includes activities linked to the Foundation's initiatives, discussions with environmental experts and exclusive social events.

The next Planetary Health Pledge, to which you are invited, will take place on Friday, November 25th and Saturday, November 26th 2022 in Monaco.

The Prince Albert II of Monaco Foundation is pleased to invite you to **the Planetary Health Award Ceremony** which will be held in the Salle Garnier of the Monte-Carlo Opera on Friday, November 25th. You will enjoy a privileged seat to attend the Ceremony which will reward three personalities with an outstanding commitment to protecting Planetary Health.

After the Ceremony, you will enjoy a special meet and greet with HSH Prince Albert II of Monaco.

To conclude this exceptional evening, you will be invited to an exclusive reception with musical entertainment at the Hermitage Hotel.

Founded in 2012 by two renowned marine biologists, ECOncrete is a science-based company recognized globally for pioneering the research and development of Bio-Enhancing Concrete Technology designed to promote marine biodiversity and enable Responsible Marine Construction.

With its multidisciplinary team of marine biologists, engineers, architects and designers, ECOncrete is a fast-growing international company that sets the standard for innovation in concrete performance and biological enhancement. Its concrete technology is used in over 40 marine infrastructure projects globally.

Planetary Health Ceremony 2022 Awardee

Pr. Dame Jane FRANCIS
Director
British Antarctic Survey
United Kingdom

Professor Dame Jane Francis is Director of the British Antarctic Survey, a research center of the Natural Environment Research Council (UKRI-NERC). She is involved in international polar organizations, such as the Antarctic Treaty and European Polar Board, and on several advisory boards of national polar programs.

Professor Dame Jane Francis is a geologist by training, with research interests in past climate change. She has undertaken research projects at the universities of Southampton, London, Leeds and Adelaide, using fossil plants to determine the change from greenhouse to icehouse climates in the polar regions over the past 100 million years. She has undertaken over 15 scientific expeditions to the Arctic and Antarctica in search of fossil forests.

Professor Dame Jane Francis was appointed Dame Commander of the Order of St Michael and St George (DCMG) in recognition of services to UK polar science and diplomacy. She was also awarded the UK Polar Medal by H.M. The Queen, is Chancellor of the University of Leeds, and a Fellow of the Royal Society.

Dr. Agnes KALIBATA
President
Alliance for a Green Revolution
in Africa
Rwanda

Doctor Agnes Kalibata has served as the President of the Alliance for a Green Revolution in Africa (AGRA) since 2014, where she leads the organization's efforts with public and private partners to ensure a food secure and prosperous Africa through rapid, inclusive, sustainable agricultural growth, improving the productivity and livelihoods of millions of smallholder farmers in Africa.

From 2019 to 2021, Doctor Agnes Kalibata also served as the Special Envoy of the UN Secretary-General for the 2021 Food Systems Summit, a catalytic process at the start of the Decade of Action to improve food systems around the world to deliver on the Sustainable Development Goals (SDGs) and Paris Agreement.

Prior to joining AGRA, Doctor Agnes Kalibata was Rwanda's Minister of Agriculture and Animal Resources (MINAGRI) from 2008 to 2014, where she drove programs that moved her country from a food insecure to a food secure status and became a reference point for other countries that sought to deliver agriculture transformation.
